TONER-1-V sample sheet

Eighteen classes, four doodles each, every pixel drawn inside this one print job.

16 × 16 one-bit pixels each: after BOS and a class token, TONER-1-V samples 64 patch tokens (2 × 2 pixels, 16 possible values) at temperature 0.9, one forward pass per token, with a 103,536-parameter int8 transformer. Seeds 1–72, top to bottom within each class; unedited, nothing cherry-picked.
